Mrs. Plunkett reviewed the Authority's Financial Report, including the checks being presented for payment. Director Fessler moved to approve the Financial Report, including the checks being presented for payment, and with all Directors voting in favor, the motion passed.

GENERAL MANAGER'S REPORT

A. Status of Water Supply and Conversion. Ms. Batson presented an update on surface water conversion progress during the current permit year, including charts illustrating conversion trends over time. Ms. Batson also reported that the permit reconciliation has been submitted to the Harris-Galveston Subsidence District, indicating a conversion of approximately 33.9% for the last permit year, which is above the 30% requirement, and which means the Authority has earned 1.4 billion gallons worth of over conversion credits for the last permit cycle.

B. AECOM Technical Services, Inc. Contract. Mr. Chang recommended that the Authority enter into the standard Agreement for Professional Engineering Services with AECOM Technical Services, Inc. ("AECOM"), replacing an outdated agreement. Director Fessler moved to approve the Agreement for Professional Engineering Services with AECOM, and with all Directors present voting in favor, the motion passed.

C. NEWPP Expansion Project. Mr. Singh reported that by next month, or by June, a Certificate of Substantial Completion for Phase 2B may be issued. He reported there were pending punch list items which needed to be completed and were currently being addressed.

D. NHCRWA Office Relocation. Mr. Chang reported that he was negotiating with the owner of the proposed office building located on SH249, but that an agreement has not been reached yet.

E. Heidaker Land Services, Inc. Contract. Mr. Chang presented the Agreement for Professional Services with Heidaker Land Services, Inc. ("Heidaker Agreement") for real estate acquisition services. Mr. Chang emphasized the need to bring additional support on board to accelerate the process. Director Rowell moved to approve the Heidaker Agreement, and with all Directors present voting in favor, the motion passed.

F. Succession Planning. Mr. Chang indicated there was nothing to report at this time.

PROPOSED RATE ORDER CHANGE

Director Ramsey acknowledged that the proposal to amend the Rate Order had generated a lot of feedback. Discussion ensued with each director providing their input.

Following discussion, Director Ramsey requested Ms. Batson to provide an analysis of groundwater usage amongst Converted Entities connected to surface water for a one-month period to better understand the potential magnitude of Conservation Groundwater usage.

INFILL CONNECTION DISCUSSION

Director Ramsey indicated that this was reviewed by staff and the program manager and that there are not currently any opportunities that can easily be connected to surface water without extending the distribution system to reach the water plants. He requested staff to continue to monitor this and bring items to the Board in the future if they should arise as ideal candidates for infill projects.

WATER SUPPLY PLANNING FOR POTENTIAL DATA CENTER DEVELOPMENT

Director Rowell addressed the Board regarding data centers.

Mr. Evans was asked to keep the Board informed of any new or changing legislation related to Data Centers in Texas and its potential implications.

GROUNDWATER REDUCTION PLAN DISCUSSION

It was agreed by general consensus of the Board that the Authority would not be updating its Groundwater Reduction Plan at this time. No action taken.

BOARD POLICY CHANGES DISCUSSION

A. Calendar and Agenda Distribution. Director Ramsey stated that he wanted the Board to be given more time to review the agenda. Discussion ensued regarding options.

B. Board Review of Major Items. Director Ramsey reported he had discussed with Mr. Chang the idea of having major items be discussed at two Board meetings before action with the first meeting being discussion only and the second meeting for action in order to allow for full consideration. It was agreed not to make any revisions to the Procedural Rules but for the General Manager to implement this for major items, where possible.

FUTURE AGENDA ITEMS

Director Rowell thanked Harris County Fresh Water Supply District No. 61 for the surface water she was drinking, since her district is now receiving surface water.

Director Fessler stated that he wants to discuss the findings of the rate study and cost of water the Authority is selling.

April 1, 2026

In the liquidity space, the first quarter of the year typically sees outflows due largely to a reversal of year-end window-dressing, the corporate tax date on March 15 and preparation for individual tax payments in April. Not so this year. For instance, total industry money market fund assets under management (AUM) held firm.

What accounts for the difference? Lower tax payments due to the One Big Beautiful Bill likely played a role, but logic would point you to the Iran conflict. Nothing curtails risk-taking more than political turmoil. In these situations, investors often adjust their portfolios to increase the percentage of liquidity or stable value products. This is not “hot money,” but these investors usually keep their coats on, expecting to leave as soon as things calm down.

Yet the Iran conflict only accounted for one-third of the first quarter. Substantial assets poured into liquidity products in January and February, pushing industry money market assets to all-time highs in the week just before the attacks. Thankfully, the reason for this was positive — the attractive yields stemming from the elevated fed funds rate. For an asset class designed to seek stability of principal and ease of redemption, yields are still a main variable. The Federal Reserve raised its benchmark rate so aggressively in 2022 to counter spiking inflation, that even two years after it pivoted to easing, the target range is still attractive. In other words, cash is an asset class—gaining favor on its own merits, rather than a counter to geopolitical upheaval or anxiety over stocks.

(1) This weighted average maturity calculation uses the SEC Rule 2a-7 definition for stated maturity for any floating rate instrument held in the portfolio to determine the weighted average maturity for the pool. This Rule specifies that a variable rate instruction to be paid in 397 calendar days or less shall be deemed to have a maturity equal to the period remaining until the next readjustment of the interest rate.

(2) This weighted average maturity calculation uses the final maturity of any floating rate instruments held in the portfolio to calculate the weighted average maturity for the pool.

ECONOMIC COMMENTARY

Market review

After the longest government shutdown in history, fourth-quarter GDP growth was revised down to 0.7% annualized, largely due to a sharp decline in federal government spending, while underlying private demand was firmer. The U.S. economy appeared to be gathering steam through the first few months of the year, but the escalation of the conflict in the Middle East—and the resulting energy shock—introduced considerable downside risk.

March 2026 was dominated by geopolitics rather than macro releases. Markets were less focused on U.S. economic data—most of which reflected February conditions and therefore predated the escalation in the Middle East—and far more focused on the conflict with Iran, which has effectively shut down the Strait of Hormuz. With roughly 20% of global energy supply flowing through the Strait, the disruption drove oil prices sharply higher and became the central source of uncertainty, as investors weighed how long the conflict could persist and the extent to which it could reshape the inflation and growth outlook. Inflation readings for February were broadly constructive on a backward-looking basis, with headline and core CPI rising 2.4% and 2.5% year-over-year, respectively. Markets largely looked through the data because they predated the energy shock. While inflation has trended lower in recent months, the balance of risks remains skewed to the upside, reflecting delayed tariff pass-through and, depending on how long the conflict persists, higher energy prices. Attention shifted to the forward-looking inflation impulse from higher oil and refined products, as well as the potential for broader pass-through via transportation, logistics, and input costs. The result was a meaningful increase in upside inflation risks, raising the probability that near-term inflation prints could firm even if underlying core trends remain moderate.
